- Hi bleed controller replacement
- Vents during dump cycle (low bleed)
- Vent line on device can be tied into burner/flare for service as no bleed controller
- If used with supplied air becomes no bleed controller
- Trouble-free: Comes with filter kit to be installed upstream to filter gas/air supply

- Cheap: Saves >35% vs. industry standard low bleed devices, rebuild is 50% cheaper vs available low bleed devices
- Works with major brands of dump systems, such as Norriseal-Wellmark & Invalco
- Developed, tested and in operation in the Anadarko Basin
- Assembled in Oklahoma
- Patent Pending
