

SPEC

SPECTM

Solar Powered Electric Controller

- Eliminates methane emissions by converting existing pneumatic controlled devices to electrically controlled
- Can actuate dump valves from existing controller lever arm or via float switch/fork installation on vessel
- Can convert existing pneumatic plunger controller to emissions free
Spring mounted actuator ensures valve seats
- Bracket mount included for installation on common oilfield valves
- Small enough power draw to utilize onsite power options, or set as standalone with 50W solar powered battery box
- Single power pack can control up to 3 SPECTM devices
- Developed, tested and in operation in the Anadarko Basin
- Assembled in Elk City, Oklahoma
- Patent Pending
